18. Combined Technical and Final Evaluation

Proposals will finally be ranked according to their combined technical (S_T) and financial (S_F) scores as follows:

\[ S = S_T \times T_w + S_F \times F_w \]
Where $S$ is the combined score, and $T_w$ and $F_w$ are weightage assigned to Technical Proposal and Financial Proposal that shall be 0.70 and 0.30 respectively.

The Selected Team shall be the first ranked consulting agency (having the highest combined score). The second ranked consulting agency shall be kept in reserve in case the first ranked firm withdraws, or fails to comply with the requirements as the case may be.

EXPLANATORY MEMORANDUM

2.1(a) Latest guidelines of the scheme to be annexed.

2.1(b) Sub-schemes/ components which have separate budgetary allocations either through budget line or through Detailed Demand for Grants (DDG) may also be listed along with component-wise budget allocation

2.1(d) include details of number of states/districts/villages where it is functional

2.2 If DDG makes allocations for certain items which are not shown as sub schemes/components, the same may be separately indicated along with allocation in the table.

3.1 Complete list of states as classified by NSSO may be seen on its website.

4.1 One has to consider the Output / Outcome Indicators as duly proposed by NITI Aayog. If that is not available, then it may be taken from the SFC/ EFC memorandum as defined during appraisal of the scheme.
Output / Outcome Indicators (the numbers or percentage) must be compared with base year value with all-time points (periodicity) as per monitoring mechanism framework.

4.2 The tabulated information may be disseminated up to Tehsil / Block Level further up to village level, if possible.

4.2 (b) The focus in implementation mechanism should be on Clarity of instructions and availability of scheme or programme guidelines. It should also be included clear definition of roles & responsibilities of functionaries and how many number of clarifications / additional instructions issued w.r.t. scheme guidelines.

4.2 (c) It should also include the training on PFMS /EAT Module or Scheme’s Portal. It should also include the number of interventions and level at which carried out

Cross cutting themes can be assessed both through secondary data as well as primary. While conducting meta-analysis of existing reports, the evaluator should actively review the cross-cutting themes. The primary data for cross cutting themes will be elicited through specific questions and responses during the key informant interviews and beneficiary surveys. For example, use of IT in scheme implementation, fund flow, monitoring and evaluation can be assessed from interaction with concerned
ministries/departments as well as states officials. Similarly, gender mainstreaming can be assessed by introducing specific questions on changes in knowledge, attitude and practices pertaining gender equality, attributable to the CS intervention at hand, through household surveys.

5.2 Items under externalities should cover Best Practices, innovations or the scheme/projects where best practices were replicated.

6.3 This is very important para in the sense that the recommendations are very important for the Government and the focus of the evaluation agency should be either
